

CUMULATIVE INDEX 1999

Volume 26

January	MEDICAL-LEGAL ISSUES IN PLASTIC SURGERY, pages 1-186
April	ULTRASOUND-ASSISTED LIPOPLASTY, PART I, pages 187-339
July	ULTRASOUND-ASSISTED LIPOPLASTY, PART II, pages 341-527
October	TISSUE ENGINEERING, pages 529-686

Note: Page numbers of article titles are in **boldface** type

- Abdomen, circumferential contouring of, ultrasound-assisted liposuction for, 306-308
- Abdominoplasty, with or without suction-assisted lipectomy, 17
- Acoustic power, and electric power, in ultrasonic surgery, 458-460
- Adeno-associated viruses, in gene therapy, 667-668
- Adenoviruses, in gene therapy, 667
- Adipogenesis, fat transplantation and, 597
- Adipose tissue, surgical layers of, 305, 306
- Advertising, medical, Federal Trade Commission and, 158
- Alcohol, intravenous, intraoperative prophylactic, in ultrasound-assisted lipoplasty, 199-200
- Anemia, as complication of large-volume liposuction, 332
- Anesthesia, for large-volume liposuction, 321-322
for ultrasound-assisted lipoplasty and for suction-assisted lipoplasty, 283
for ultrasound-assisted liposuction, 367-368
superwet, for ultrasound-assisted lipoplasty, 434, 437
- Anesthesiologist, perspective of, on lipoplasty, 423-429
- Anesthetics, local, allergies to, 436
chemistry of, 431-432
considerations for use of, 427
distribution and elimination of, 428
drug interactions with, 428
effects of dose, site, and lipid solubility of, 427
mechanism of action of, 431
protein binding and, 428
toxicity of, 428-429
evaluation and treatment of, 429
- Anger, as root cause of malpractice claims, 143-147
in patient, defusion of, 144-145
normal psychodynamics of, 146-147
- Angiotensin II, 426
- Antifibrogenic therapeutic strategies, for tissue implantation, 559-560
- Anxiety, in patient, 144
in physician, 145
- Arbitration, 97-98
- Arms, circumferential contouring of, ultrasound-assisted liposuction for, 309
- Atrial natriuretic factor, 426
- Attorney(ies), as ready to take action against plastic surgeons, 153-154
comparison of medical records by, 155
conferring with, after deposition, 90
how to select, and participate in defense, from defendant's perspective, 81-86
from plaintiff's perspective, 79-80
of plaintiff, techniques of, in deposition, 90
seminars for, to teach assessment of medical dictation, 153-154
- Augmentation mammoplasty, malpractice claims associated with, 149
- Back, circumferential contouring of, ultrasound-assisted liposuction for, 308-309
- Base-pay and financial-incentive schemes, types of, 116-117
- Biodegradation, 555
- Biomaterials, hypersensitivity to, types of, 554
- Bleeding, following liposuction, 341-342
- Blepharoplasty, malpractice claims and, 16, 150
- Blood vessels, replacement of. See *Vascular replacement*.
- Body contour, irregularity of, following liposuction, 344-345
- Body contouring, circumferential. See *Liposuction, ultrasound-assisted, circumferential body contouring with*.
- Body temperature, maintenance of, during ultrasound-assisted liposuction, 235-236
- Bone(s), and cartilage, replacement of, in oral cavity, 658
tissue engineering of, 629-645
defects of, repair of, bioactive scaffolds for, 632-634
bone graft substitutes for, 629-631
cell and gene therapy for, 634
polymer scaffolds for, 631-632
tissue engineering for, 629-634
tissue engineering of, by Pittsburgh tissue engineering initiative, 533
- Bone graft substitutes, 629-631
- Breast, augmentation, malpractice claims associated with, 149
reduction, malpractice claims associated with, 150
surgery of, malpractice claims and, 16
- Breast implant(s), litigation concerning, media and, 2, 3
placing of, patient review and advisory and consent form for, 177-179

- Breast implant(s) (*Continued*)
 removal of, patient advisory and consent form for, 180-181
 silicone, 1-2, 149
- Bruising, unusual, following liposuction, 341-342
- Bupivacaine, cardiac toxicity associated with, 429
- Buttocks, circumferential contouring of, ultrasound-assisted liposuction for, 308
- Cable, for ultrasound-assisted lipoplasty, 300
- Cannula, for ultrasound-assisted lipoplasty, 301-304
- Capsular contracture, as risk in augmentation mammoplasty, 149
- Cardiac toxicity, associated with bupivacaine, 429
- Cardiomyocytes, cellular cardiomyoplasty using, for cardiac allograft transplantation, 612-613
 in cardiac muscle regeneration, 652
- Cardiomyoplasty, cellular, using cardiomyocytes, in cardiac allograft transplantation, 612-613
 using myoblasts, in cardiac allograft transplantation, 611-612
 molecular, in cardiac allograft transplantation, 613
- Cardiovascular system, tissue engineering for, clinical need for, 605
 directions in, 605-616
 future of, 613-614
 tissue engineering of, by Pittsburgh tissue engineering initiative, 534
- Cartilage, and bone, tissue engineering of, 629-645
 oral, and bone replacement, 658
 repair of, current therapy in, 636-637
 effect of growth factors on, 637-638
 scaffold design for, 638-641
 tissue engineering for, 634-641
 problems confounding strategies for, 635-636
- Cavitation, acoustic, in ultrasound, 410, 411, 412-414, 447
 and jackhammer effects, interaction of, in ultrasound-assisted liposuction, 498-500
 and microstreaming, interaction of, in ultrasound-assisted liposuction, 496-498
 energy focusing in, in ultrasound-assisted lipoplasty, 463-470
 hydrodynamic, in ultrasound, 410
 in internal ultrasound-assisted liposuction, 487
 in ultrasound-assisted liposuction, 261
 ultrasound-assisted lipoplasty and, 217-219, 222-225, 292
- Cavitron Ultrasonic Surgical Aspirator, 221, 225
- Cell culture, combinatorial. *See* *Combinatorial cell culture*.
- Cellular therapy, and gene therapy, for repair of bone defects, 634
- Central nervous system, effects of lidocaine on, 427-428
- Chemical peels, malpractice claims and, 17
- Chemotherapy, ultrasound and, 415-416
- Circumferential body contouring. *See* *Liposuction, ultrasound-assisted, circumferential body contouring with*.
- Combinatorial cell culture, applications of, to cell-to-cell interactions, 574-575
 for expansion of hematopoietic stem cells, 571-573
 of hematopoietic stem cells, applications of, 573-574
- Communication, effective, 133-136
 as claims prevention technique, 38-39
 failure of, 41-51
 importance of listening in, 133-136
 in physician's office, role of, 133-141
 nurse-physician, problems of, 136-138
 perioperative, 43-45
 postoperative, 45-48
 preoperative, 42-43
 telephone, as source of potential liability, 138-140
 documentation of, to defend disagreements, 140
 verbal and nonverbal expression in, 134-135
- Compression garments, following ultrasound-assisted liposuction, 366-367
- Computer imaging, for ultrasound-assisted liposuction, 273-274, 275, 276
- Conference on Ultrasound-Assisted Liposuction Safety and Effects, presenters at, 482
 report from, 481-524
 reports at, on bioeffects of ultrasound, 502-517
 on future of UAL, 517-520
 on mechanisms of action of UAL, 494-502, 517
 on physics of UAL, 483-494
- Consent, implied, consent-in-fact, and informed consent, 58
 informed. *See* *Informed consent*.
- Consent forms, recommended by The Doctors' Company, 145, 175-181
- Consultant, in hospital setting, liability as, 33
- Contour defect, revision of, human matrix for, 582-583
- Cytokines, role of, in tissue implantation, 558-559
- Damages, 94-95
- Deep venous thrombosis, as complication of large-volume liposuction, 333
 as complication of liposuction, 349-350
 prophylaxis of, 351-352
 symptoms of, 350
 treatment of, 351
- Defendant, deposition of, 84-85
 trials, settlements, and arbitration from perspective of, 97-101
- Defense, one's own, participation in, 81-83
- Dentistry, tissue engineering and, 657-662
- Deposition, 87-90
 actual, conduct during, 89
 conferring with attorney after, 90
 description of, 87
 importance of, 87-88
 preparation for, 88-89
 techniques of plaintiff's attorney in, 90
- Dermal-based product(s), for contour revision, 582-583
 for wound covering, clinical utility of, 581-582
 for wound healing and tissue reconstruction, 583-584
 human, manufacturing of, 580-581
- Dermis. *See also* *Skin*.
 tissue-engineered, 579-580
 manufacturing of, 580-581
- Doctor-patient relationship, 53-55
 irrational, 145-146
- Doctrine of vicarious liability, 12-13
 responsibility for acts of other physicians and, 13
- Documentation, of telephone communications, to defend disagreements, 140
 prior to, and following surgery, 126
- Dow Corning, 2, 3, 6
- Drug interactions, affecting lidocaine activity and toxicity, 433
- Duchenne muscular dystrophy, myocyte gene therapy in, 673
- Dysesthesia, over treated area, following liposuction, 345-346
- Dysesthesias, following laser surgery, 112
- Dysmorphophobia, 42

- Edema, as risk of ultrasound-assisted lipoplasty, 197-198
- Education and training, of staff, for ultrasound-assisted lipoplasty, 295-298
- Electric power, and acoustic power, in ultrasonic surgery, 458-460
- ElectroStatic Detection Apparatus, 62-65
- Emboli, pulmonary, as complication of large-volume liposuction, 333
 following ultrasound-assisted lipoplasty, 198-199
- Emergency, improper evaluation of, due to poor communication, 137-138
- Emergency room, plastic surgeon in, 32-33
- Emotional stress. *See Stress.*
- Endomicroscope, anatomic approach through, for lipoplasty, 380-385, 387
- Endomicroscopy, for comparison of techniques and technologies of lipoplasty, 377-407
- Engineered human tissues, acellular component of, immune responses against, 551-560
 cellular component of, adaptive immune responses against, 560-561
 sources of, options for, 561-567
 commercial introduction of, understanding external controls over, 537-548
 host defenses and mechanisms and, 549-550
 immunological definition of, 549-551
 implants of, for plastic and reconstructive surgery, 579-586
 regulation of, by Food and Drug Administration, 537-545
 types of, 550-551
- Epinephrine, advantages of, 436
 adverse effects of, 436
 dosages of, 436
 metabolism of, 436
 optimal concentration of, 436
- Epinephrine-containing isotonic wetting solutions, 291-292
- Epinephrine toxicity, as complication of large-volume liposuction, 332
- Equipment. *See also Medical devices; Surgical devices; Surgical devices.*
 for hollow cannula technology in ultrasound-assisted lipoplasty, 256-257, 258
 for ultrasound-assisted lipoplasty, 190, 211-212, 299-304
 and for suction-assisted lipoplasty, 284-286
 physical acoustics of, 470-476, 477
 for ultrasound-assisted liposuction, 295-296
 new, for new technology to plastic surgery office, 360
- Ethics, and managed care, 163-173
 medical, key principles of, 163-164
 principles of, conflict with managed care, 169-170
- Expert witness, 91-92
 knowledge of subject matter by, 92
 reactions of, to questions asked, 92
 reactions to hiring attorney, 92
 reactions to own attorney, 92
 reactions with people, 92
- Extracellular matrix, role of, in tissue implantation, 556-558
- Face lift, malpractice claims and, 16
- Fat, autologous, implantation and engraftment of, 597
 transplantation of, 588
 autologous cells, procurement of, for tissue engineering, 589-590
 breaking up of, with ultrasound, 416-417
 tissue engineering of, clinical need for, 587
 current options in, 587-588
 emerging approaches to, 587-603
 strategies for, 588-600
 transplantation of, adipogenesis and, 597
 cell growth and differentiation and, 590-597
 implant integration and histogenesis in, 599-600
 polymer scaffolds for, 597-599
- Fat emboli, following ultrasound-assisted lipoplasty, 199
- Fat emboli syndrome, as complication of large-volume liposuction, 332
 following liposuction, 347-348
 following ultrasound-assisted lipoplasty, 199
- Fatigue factor, associated with lipoplasty, 286
- Federal Trade Commission, medical advertising and, 158
- Fibrosis, following tissue implantation, 555-556
- Financial-incentive schemes, and base-pay schemes, types of, 115-116
- Financial incentives, managed-care, conflicts of interest and, 117-120
 steps for specialists and, 120
 to limit care, ethics of, 115-121
- Flanks, circumferential contouring of, ultrasound-assisted liposuction for, 306, 307
- Fluid imbalance, as complication of liposuction, 348-349
- Fluid overload, clinical signs of, 427
 prevention and management of, 427
- Fluids, rapid injection of, consequences of, 426
- Food and Drug Administration (FDA), approval pathways of, for human cellular and tissue-based products, 544
 classification of medical products by, 538-541
 documents of, on regulation of tissue and cell therapies, 540-541
 marketing review and approval pathways of, 541-544
 Modernization Act (1997), 544-545
 regulation of engineered human tissues by, 537-545
 and product liability, 545-546
 regulatory centers of, for medical products, 538
 silicone implants and, 1-2
- Foreign body reaction, to tissue implantation, 555-556
- Forensic testing, of medical record, document dating for, 67
 ElectroStatic Detection Apparatus in, 62-65
 infrared examinations for, 65, 66
 ink dating for, 67
 for obliterations, 67
- Gene gun techniques, 665
- Gene therapy, and cellular therapy, for repair of bone defects, 634
 and tissue engineering, 663-676
 future prospects for, 674
 basis of, 663-668, 669
 chemical mediators in, 665-666
 for nervous system, 673-674
 in skin disorders, 669-671
 microinjection in, 665
 muscles and, 673
 myoblast-mediated, 648
 nonviral vectors in, 665-666
 particle-mediated gene transfer in, 665
 rationale for, 663
 regulating gene product in, 668, 669
 suitable targets for, 664
 tissue-specific interventions and, 669-674

- Gene therapy (*Continued*)
 transfection in, 664-665
 by electroporation, 666, 667
 vascular, 671-673
 viruses as vectors for, 666-668
- Generator, for ultrasound-assisted lipoplasty, 299-300
- Glycosaminoglycans, matrix proteins and, 582
- Granulation, in tissue implantation, 555
- Growth factors, effect of, on cartilage repair, 637-638
 from tissue-engineered implants, 584
- Handpiece, for ultrasound-assisted lipoplasty, 300-301
- Heart, allograft, transplantation of, cellular
 cardiomyoplasty in, using cardiomyocytes, 612-613
 using myoblasts, 611-612
 molecular cardiomyoplasty in, 613
 statistics on, 610-611
- Heart valve(s), bioprosthetic, 605-606
 mechanical, 605-606
 tissue-engineered, experimental approach for, 606, 607
- Hematoma, as risk of ultrasound-assisted lipoplasty, 198
- Hips, circumferential contouring of, ultrasound-assisted
 liposuction for, 306, 307
- Hospital, avoiding of malpractice in, 29-35
 doctrine of corporate negligence and, 156-157
 selection of competent medical staff by, 157
- Hyperthermia, ultrasound-induced, 415
 in liver surgery, 415
- Hypothyroidism, 426
- Hypovolemia, as complication of large-volume
 liposuction, 332
- Hypovolemic shock, following ultrasound-assisted
 lipoplasty, 198
- Illouz technique of lipoplasty, 191
- Immune evasion, adaptive, strategies for, 564-565
- Immune response(s), adaptive, to genetically-engineered
 autologous cells, 565-567
 against acellular component of engineered human tis-
 sues, 551-560
 characteristics of, 550
- Immune system, components of, 550
- Implants, tissue-engineered, growth factors from, 584
- Incisions, access, for body contouring with ultrasound-
 assisted liposuction, 309-310, 311
 for ultrasound-assisted lipoplasty and for suction-
 assisted lipoplasty, 285
- Infection, as risk of ultrasound-assisted lipoplasty, 198
 following laser surgery, 111-112
 following liposuction, 343
- Inflammation, acute, following injury or implantation,
 552-553
 chronic, following injury or implantation, 553-555
 following laser surgery, 11109
- Informed consent, consent-in-fact, and implied consent,
 58
 documentation of, 60
 extent of, 59
 for large-volume liposuction, 320
 for laser surgery, 113
 for ultrasound-assisted lipoplasty, 105-107
 for ultrasound-assisted liposuction, 273
 fully, obtaining of, 145
 patient education prior to, 126-128
 "prudent patient" test and, 57-58
 refusals of treatment and, 58
 sample documentation for, 61-62
 six elements of, 59-60
 therapeutic objective of, 143
 therapeutic value of, 60-61
- Infusion techniques, superwet or tumescent, for
 ultrasound-assisted lipoplasty, 292
- Injury, tissue responses to, 552, 553
- Inpatient versus outpatient care, liability and, 33
- Instrumentation, for ultrasound-assisted lipoplasty,
 299-304
- Insurance, and suction-assisted lipectomy, factors
 affecting, 442-443
- Insurance carrier(s), actuarial predictions and, 21-22
 incurred loss and, 22
 loss experience and, 22
 maturity and, 22
 obligations of, in face of inept physicians, 158
 questions concerning, 158
 premiums and reserves and, 22-23
 profit or loss and, 23
 re-underwriting and, 23
 reinsurance and, 23
 reserves-to-surplus ratio and, 23
 spreading the risk and, 23-25
 surplus and, 25-26
 viewpoint of, medical malpractice claims and, 21-28
- Intracavitary penetration, as complication of large-
 volume liposuction, 333
- Intraoperative period, considerations in, to avoid
 liability claims in, 35
- Jackhammer effects, and cavitation, interaction of, in
 ultrasound-assisted liposuction, 498-500
- Kesselring suction-assisted curettage, 190-191
- Laser(s), hazards of, 110-113
 safety of, 109
- Laser resurfacing, malpractice claims and, 17
- Laser resurfacing techniques, problems associated with,
 151
- Laser surgery, dysesthesias following, 112
 infection following, 111-112
 inflammation following, 111
 informed consent for, 113
 pigmentary changes associated with, 110
 risks of, 109-113
 scarring following, 112
 sensitivity following, 112
 side effects versus complications of, 110
 vascular changes following, 112-113
- Liability, for acts of third party, 34
 inpatient versus outpatient and, 33
 vicarious, Doctrine of, 12-13
 responsibility for acts of other physicians and, 13
- Liability claims, avoidance of, criteria for patient
 selection for, 37-40
 during various stages of treatment, 34-35
- Lidocaine, as wetting solution, 289, 290
 central nervous system effects of, 427-428
 conditions affecting activity and toxicity of, 433
 delayed absorption of, during liposuction, 433
 in ultrasound-assisted lipoplasty, 431-439
 levels of, 432-433

- medications affecting activity and toxicity of, 433
- physiology of, 432
- practical use of, in lipoplasty, 434
- protein binding of, 433
- safety and effectiveness of, for liposuction, 435
- solution containing, for use in lipoplasty, 433-434
- total plasma concentrations of, 432-433
- toxic reactions to, 435
 - as complication of large-volume liposuction, 331
 - associated with liposuction, 349-350
 - treatment of, 435
- toxicity of, 435
- Lipectomy, introduction of, to plastic surgeons in
 - United States, 441
- suction-assisted, abdominoplasty with or without, 17
- and insurance, factors affecting, 442-443
- liability in, 441-445
- malpractice claims and, 17
- retrospective loss experience associated with, 443-445
- surgical, traditional, 193
- ultrasound and, 443
- Liperexesis, 289
- Lipocrit, 289
- Lipolysis, 289
- Lipoplasty, and traditional liposuction, 385, 389, 391
 - classification of, by volume of adipoaspirate, 290
 - endomicroscope for, 380-385, 387
 - external ultrasound-assisted, and ultrasound-assisted, compared, 401, 403-404, 405
 - large-volume, care of patients for, 291
 - large-volume aspiration in, 400
 - malpractice claims associated with, 151
 - means of exploration of, 378, 379-380
 - methods and materials for, 377-380
 - patient selection for, 377-379
 - perioperative external ultrasound energy in, 400, 401, 402
 - perspective of anesthesiologist on, 423-429
 - postoperative care in, 400-403
 - suction-assisted, and ultrasound-assisted, compared, 403, 405
 - and ultrasound-assisted lipoplasty, comparing of, 283-288
 - wetting solutions in, 434
 - superwet and tumescent techniques of, compared, 396, 404, 405
 - techniques of, and technologies of, compared, and practical applications of, 403-404, 405
 - endomicroscopic comparison of, 377-407
 - results of, 380-403
 - compared, 379, 380, 381
 - ultrasonic, potential harmful effects of, 417-420
 - ultrasound-assisted, 103-107, 187-335, 341-524, 369-375
 - advantages of, 373
 - and external ultrasound-assisted, compared, 401, 403-404, 405
 - and suction-assisted, compared, 403, 405
 - and suction-assisted lipoplasty, comparing of, 283-288
 - differences between, 284-286
 - operative technique for, 286-288
 - similarities between, 283-284
 - anesthesia for, 106
 - applications of, 195-196
 - ASPRS committee report on, 188-190
 - basic physics for, 209-220
 - basic science and clinical research in, 221-234
 - basis for starting, 371-373
 - biologic effects of, 217-219
 - bruising and postoperative pain following, 106
 - cable for, 300
 - cannula and probe for, 301-304
 - cavitation and, 217-219, 222-225, 292
 - cavitation in, energy focusing in, 463-470
 - clinical applications of, 404
 - complications of, 191-192
 - contours and skin irregularities following, 105-106
 - definition of, 283
 - devices for, model for introduction of, 207
 - physical acoustics of, 470-476, 477
 - regulation of, 206-207
 - disadvantages of, 373
 - dressings for, 200-201
 - economic factors in, 372-373
 - education and training in, 103-104
 - equipment and instrumentation for, 299-304
 - equipment for, 190, 211-212
 - factors to consider before starting, 373, 374
 - five-year update evaluation of, 194-201
 - fluids and, 434
 - generator for, 299-300
 - handpiece for, 300-301
 - history of, 187-188
 - hollow cannula technology in, 255-260
 - clinical technique for, 257-259
 - current technology for, 256-257
 - evacuation in, 259
 - historical perspective of, 255, 256
 - hollow-cannula emulsification in, 258-259
 - patient selection and indications for, 257-258
 - site preparation for, 258
 - hollow-probe technique in, 399-400
 - hypoesthesias/dysesthesias after, 106
 - incisions and scarring in, 106-107
 - informed consent for, 105-107
 - interactions in, theories of, 457-458
 - intraoperative prophylactic intravenous alcohol in, 199-200
 - large-volume removals using, 106
 - learning skill of, 372
 - lidocaine in, 431-439
 - long-term effects of, 106
 - luminescence from, 465, 467, 468, 469
 - marking for, 280-282
 - micromechanical effects of, 219, 222
 - operative principles for, 305-316
 - patient evaluation and indications for, 269-378
 - patient selection for, 279-280
 - planning, and marking in, 279-282
 - physical acoustics of, 463-479
 - physical principles of, 209
 - physician training and, 195
 - physiotherapy following, 192
 - planning for, 280
 - positioning for, 235-243
 - postoperative care in, 192
 - postoperative ultrasonography in, 200
 - postprocedure activity in, 201
 - potential long-term effects of, 225
 - reasons for using, 104-105
 - recommendations for, 193-194
 - regulatory aspects of, 205-207

 - safety issues in, 317-335

Lipoplasty (*Continued*)

- safety versus efficacy for, 371-372
 - seroma formation associated with, 105
 - skin necrosis associated with, 105
 - skin protection devices for, 304
 - solid-probe technique in, 385-399. See *Solid-probe ultrasound-assisted lipoplasty*.
 - sonoluminescence in, 465, 476-478
 - staff education and training for, 295-298
 - superwet anesthesia for, 434, 437
 - task force analysis of, 187-204
 - task force statement on, 202-203
 - thermal effects of, 217, 222
 - thermal injury associated with, 105
 - tissue interactions and, 209-211
 - types of techniques of, 190-191
 - update on, 201-202
 - wave properties and, 211
 - wetting solutions in, 289-293, 434
 - with various machines, 385-400
 - ultrasound for, review and examination of, 409-422
 - wetting and infiltration in, 384, 385, 396
- Liposuction, bleeding or unusual bruising associated with, 341-342**
- complications of, 423
 - and their prevention, 341-354
 - contour irregularity following, 344-345
 - deep venous thrombosis and pulmonary embolism complicating, 350-352
 - delayed absorption of lidocaine during, 433
 - dysesthesia over treated area following, 345-346
 - fat embolism syndrome following, 347-348
 - fluid imbalance as complication of, 348-349
 - high volume, malpractice claims and, 17-18
 - infection following, 343
 - large-volume, complications of, 330-333
 - definition of, 317-318
 - history of, 317-318
 - medical history of patient and, 318-319
 - patient factors and, 318
 - physical examination for, 319-320
 - preoperative considerations for, 318-320
 - statistics on, 329-330
 - ultrasound-assisted, anesthetic considerations for, 321-322
 - informed consent for, 320
 - operative approaches for, 322-327, 328-329
 - perioperative fluid management for, 326-328
 - postoperative care in, 328-329
 - preoperative markings for, 320-321
 - preoperative photography for, 320
 - preoperative preparation for, 320
 - surgical setting for, 320
 - wetting solution for, 323
 - lidocaine toxicity associated with, 331, 349-350
 - perforation of visera during, 352-353
 - seroma development following, 343-344
 - skin necrosis following, 345
 - suction-assisted, definition of, 283
 - indications for, 273
 - thermal injury in subcutaneous space in, 346-347
 - ultrasound-assisted, anesthesia for, 367-368
 - antioxidant defense systems in, 511-513
 - body types for, 276, 277
 - cavitation in, 261
 - circumferential body contouring with, anatomic areas for, 306-309
 - log of infiltration and aspiration volumes for, 312
 - markings and access incisions for, 309-310, 311
 - operative technique for, 310-313
 - results of, 313, 314, 315
 - compression garments following, 366-367
 - costs of, 364
 - DNA damage and repair associated with, 513-516
 - epidemiologic studies in, 519-520
 - equipment for, knowledge of, 295-296
 - potential pitfalls of, 296
 - external, 519
 - mechanisms of, 501-502
 - flow sheet for, 365, 366
 - free radicals and cellular effects of, 518-519
 - free radicals and reactive oxygen metabolites in, 504-511
 - heating of ultrasonic device for, 492-493
 - hollow ultrasonic probes for, 267
 - in United States, 226-233
 - basic science research in, 226-227, 228
 - clinical research in, 227-229, 230
 - clinical reviews of, 229-233
 - zones of adherence for, 231, 232
 - incision ports for, 364
 - indications for, 272-273
 - informed consent for, 273
 - infusion pumps for, 364
 - infusion solutions for, 365, 366
 - initial consultation for, 269-270, 271
 - internal, cavitation in, 487
 - handpiece used in, 483-484
 - lateral decubitus position for, 242-243
 - maintenance of body temperature during, 235-236
 - massage therapy following, 367
 - monitoring of urine output during, 235
 - nonthermal mechanisms of, 486-487
 - office personnel instruction in, 297-298
 - operating room setup for, 296-297
 - operative strategy for, 274-278
 - padding bony prominences for, 236, 237
 - patient advisory and consent form for, 175-176
 - photography and computer imaging for, 273-274, 275, 276
 - physical examination for, 270-272
 - postoperative care following, 366-367
 - postoperative complications of, office personnel and, 298
 - postoperative seroma/induration in, prevention of, 365-366
 - potential problems in operating room during, 296-297
 - power levels, cavitation, and heat in, 492
 - practical guide to, 363-368
 - precautions in use of, 521-522
 - preoperative evaluation for, 364-365
 - prone positioning for, 236-237
 - protocols for, development of, 520
 - safety concerns associated with, 520-521
 - shear forces and cavitation in, 500-501
 - soft tissue fragmentation in, 494-496
 - solid probes for, 266-267
 - sonochemistry in, 503-504
 - sonoluminescence in, 490-492
 - suction and wetting solution in, 519
 - supine positioning for, 239-242
 - terminology associated with, 484
 - thermal effects of, 485-486, 502-503, 517-518
 - tip erosion and cavitation pitting in, 494
 - ultrasonic generator systems for, 262-265
 - ultrasonic sheath system for, 265-266
 - ultrasonically induced actions of, 485-490

Listening, importance of, in communication, 133-136

 - skills, 134-135

- ten bad habits of, 134
- Litigation, coping with, strategies for, 75-77
 - physician reaction to, reasons for, 74-75
 - process of, 75
 - stress of, how to handle, 69-77
 - understanding of, 71-75
- Liver, surgery of, ultrasound-induced hyperthermia in, 415
- LySonix ultrasonic surgical system, 262
 - and Mentor Contour Genesis system, compared, 262-265
- Malpractice, avoiding of, in private practice and hospital setting, 29-35
- Malpractice claim(s), against plastic surgeon, genesis of, 123-131
 - anger as cause of, 144-147
 - assessing meaning of, 73-74
 - associated with suction-assisted lipectomy, 443
 - breast surgery and, 16
 - causation and, 13
 - common reactions to, 72-73
 - damages and, 13
 - elements of, 9
 - genesis of, 15-19
 - insurance carrier's viewpoint and, 21-28
 - prevention of, strategies for, 69-71
 - problems causing, 149
 - removal of skin lesions and, 130
- Malpractice insurance, introduction of new technology to plastic surgery practice and, 359-360
- Mammoplasty, augmentation, malpractice claims associated with, 149
 - reduction, malpractice claims associated with, 150
- Managed care, conflict of ethical principles with, 169-170
 - dual function of, centrality of, 166-167
 - ethical assumptions of, 166
 - ethical credo for, 170
 - ethics and, 163-173
 - financial incentives, conflicts of interest and, 117-120
 - steps for specialists and, 120
 - to limit care, ethics of, 115-121
 - limitations on care and, 167-168
 - medical profession and, prescription for collective action of, 172
 - principal features of, 164-166
- Managed care organizations, ethical arguments
 - opposing, 171
 - ethical arguments supporting, 171
 - ethical rules for, 170
 - questions for physicians considering, 171-172
 - values of, compared to values of physicians, 164
- Markings, for body contouring with ultrasound-assisted liposuction, 309-310, 311
 - for ultrasound-assisted lipoplasty, 280-282
 - and for suction-assisted lipoplasty, 283-284
 - preoperative, for large-volume liposuction, 320-321
- Marrow transplantation, immunologic incompatibility and, 570
- Massage therapy, following ultrasound-assisted liposuction, 367
- Mediation, 97
- Medical advertising, Federal Trade Commission and, 158
- Medical devices, classification of, 205-206
 - definition of, 205
 - marketing of, 206
- Medical ethics. See *Ethics*.
- Medical-legal issues, in plastic surgery, 1-181

- Trauma cases, treatment of, by plastic surgeon, 129-130
- Trial(s), 100
- settlements, and arbitration, from defendant's perspective, 97-101
 - from plaintiff's perspective, 93-95
- Ultrasonic surgery, acoustic power and electric power in, 458-460
- devices used in, 485
 - history of, 448
 - interactions in, theories of, 453-458
 - ultrasound radiation and, 448-450
- Ultrasound, acoustic attenuation in, as absorption plus scattering, 411
- acoustic cavitation in, 410, 411, 412-414, 447
 - acoustic radiation force and, 412
 - acoustic streaming in, 410, 412
 - Bjerknes forces in, 412
 - for lipoplasty, potential harmful effects of, 417-420
 - review and examination of, 409-422
 - fundamentals of, 409-415
 - heat generation with, 411-412, 414
 - history of use of, in medicine, 225-226
 - hydrodynamic cavitation in, 410
 - lipectomy and, 443
 - microstreaming in, 410, 412, 413
 - plane waves in, 410
 - process of breaking up fat by, 416-417
 - sonoluminescence and, 414-415, 454
 - therapeutic, review of, 415-416
 - tissue effects of, understanding of, 221-225
 - tissue warming with, precautions in, 415
 - uses of, 485
 - with chemotherapy, 415-416
- Ultrasound-assisted lipoplasty. See *Lipoplasty, ultrasound-assisted*.
- Ultrasound-assisted liposuction. See *Liposuction, ultrasound-assisted*.
- Ultrasound radiation, ultrasonic surgery and, 448-450
- Urine output, monitoring of, during ultrasound-assisted liposuction, 235
- Vascular changes, following laser surgery, 112-113
- Vascular replacement, 607-610
- biologic and tissue-engineered substitutes for, 610
 - endothelial cell seeding for, 607-608
 - gene therapy in, 671-673
 - gene transfer for, 608-610, 671-673
- Viruses, as vectors for gene therapy, 666-668
- Viscera, perforation of, during liposuction, 352-353
- Water balance, daily, in normal subject, 423, 424
- extrarenal mechanisms in, 425
 - physiologic mechanisms in, 423-424
 - renal mechanisms in, 424
- Wetting solutions, epinephrine-containing isotonic, 291-292
- for large-volume liposuction, 323
 - for lipoplasty, 434
 - for ultrasound-assisted lipoplasty, 289-293
 - and for suction-assisted lipoplasty, 284, 285
 - for ultrasound-assisted liposuction, 519
 - in lipoplasty, evolution of, 289-290
 - role of, in tissue fragmentation using ultrasonic frequency metal probe vibration, 456-457
- superwet, and tumescent, compared, 290-291
- formula for, 291
- White lung syndrome, as complication of large-volume liposuction, 332
- following ultrasound-assisted lipoplasty, 199
- Wound covering, dermal-based products for, clinical utility of, 581-582
- Wound healing, and tissue reconstruction, dermal-based products for, 583-584
- Xylocaine, as wetting solution, 289, 290
